**TATA CONSULTANCY SERVICES**

## Welcome to DrupalCon Asia

My favorite part of working in the Drupal community is that it never stops changing. New people, new ideas, and new projects are always being integrated into our Drupal universe. I love to be part of a community that is always so ready to shed its skin and reinvent itself.

It's especially fitting then that we are finally in Mumbai, a place where change is normal and diversity has created a remarkable culture. The Asian region has made significant contributions to the Drupal project - three of the top 25 contributing companies to Drupal are right here in India, and you're poised to make even more contribution.

So let's use this DrupalCon as the springboard for making that growth happen. Use the sessions, social events, and chats in the hallways to strengthen your connection to the rest of the Asian Drupal community. Help someone new find their way through the code and our community. Brainstorm the next great set of meetups and Camps. And don't forget to let the Association know how we can help you make it all happen.

**Holly Ross**  
Executive Director  
Drupal Association

# Session Tracks

## BUSINESS AND STRATEGY

The Business and Strategy track is aimed at attendees looking for actionable advice, ideas and challenges from business owners, executives, and project managers in the digital experience industry. Sessions in this track will be non-technical by nature. Sessions cover a mix of product/service strategy, general management, sales and marketing and project management topics.

## CODING AND DEVELOPMENT

PHP and Drupal are changing rapidly and collaboration among projects is shaping a new way to create code. The Coding and Development track will show you how you can leverage evolving tools and processes to increase the efficiency, velocity, and quality of projects. This track will help developers to be up-to-date with Drupal 8, not only on the Drupal island, but demonstrating the best practices and industry standards of the web today.

## CASE STUDIES

Drupal is an amazing, flexible system for building websites that constantly surprise. The realm of the possible is ever expanding as Drupal keeps up with the pace of the web, and the mindshare of our growing community pushes into new territory each year. With Drupal 8 this is more true than ever. The Case Studies track will showcase projects to show what's possible, and to inspire. Be prepared to hear about the inner-workings of the project, who participated, the process and methodology, the problem or opportunity that was addressed, and best of all, how it was all made possible with Drupal!

## CONTRIBUTIONS

The Contributions track is the place for people who want to work on and contribute to Drupal core, contributed modules and the community. Contribution is not limited to writing code, it includes event organization, documentation writing, module translation and anything supporting the Drupal project in any way. While most of the talks at the Con are about how to use Drupal to build websites, and deliver value to our clients, this track is filled with sessions on how to help make Drupal better by getting involved in the project. Learn how to give something back to Drupal by making a contribution.

## FRONTEND

The Frontend development ecosystem continues to evolve rapidly. With new tools, techniques and practices constantly emerging, and an ever-increasing diversity of devices and contexts to consider, our roles as Frontend Developers have never been more complex, or more essential. On top of all this, the release of Drupal 8 has significantly changed how we approach theming. Come to learn about the new baselines for Frontend Developers, the essential skills one must have, and what we should keep our eyes on in the months to come.

## SITE BUILDING

The power of Drupal lies not just in itself, but also in the 17,000+ contributed modules that allow one to build sites quickly and efficiently. The Site Building track is designed to teach you ways to let Drupal do the hard work without writing any code. This track is aimed at people looking to build sites using the Drupal framework but are not PHP masters, people who need better tools to layout their site, and people who want to add functionality to their site but aren't sure where to start. Sessions in this track will be technical in nature, although they would not usually involve any coding.

## MOBILE

There are more mobile devices on earth than people. There are over 2.8 billion people online today. The next 1 billion will be mobile-only. Companies are making dual investments in apps and mobile web experiences to reach audiences across smartphones and tablets. In addition, the Internet of Things (IoT) is rapidly growing and evolving around us, a myriad of devices collecting nuggets of data from a wide variety of sources that must be collected, stored, analyzed and displayed in a meaningful manner. You have to think about mobile touch points as the first experience your prospects have with you – whether browsing your site from their phone, or downloading and installing your app. For many this may be the only device they ever use. Learn how Drupal helps build, extend, enhance and optimize your existing applications, and build new mobile websites and mobile apps to tell your story as you intend it.

# Thursday, 18 February

Drupal Trainings and Summits are not included in a DrupalCon ticket. Attendees must hold valid tickets to these day-long events. All events take place at the Victor Menezes Convention Centre. Breakfast and lunch are included for registered Summit and Training attendees only.

## Registration & Help Desk

**Time:** 8:00-18:00

## Breakfast

**Time:** 8:00-10:00

## Drupal Trainings

**Time:** 10:00-18:00

Gain hands-on knowledge on popular Drupal topics by world-class Drupal trainers.

**Drupal 8 In A Day | Auditorium**

**Build Frontend / Mobile Applications with Headless Drupal | Room 03**

**Drupal 8 Theming | Room 04**

**Personalization and Dynamic Content in Drupal | Room 05**

## Contribution Sprints

**Time:** 10:00-18:00

**Room 15**

The Drupal Association continues to recognize the need for extended sprints as part of the DrupalCon schedule and is providing sprint space throughout the Con! Learn more at <https://events.drupal.org/asia2016/sprints>.

## Summits

**Business Summit | Room 11 | 10:00-18:00**

The Drupal Business Summit is primarily aimed at business leaders who provide Drupal services (web development agencies, training companies, etc). Join us for a candid peer discussion and networking with other Drupal executives.

**Higher Education Summit | Room 12 | 10:00-18:00**

The Higher Education Summit will be a day-long event featuring panel discussions, case studies on adopting Drupal, presentation and brainstorming sessions about challenges faced by universities.

**Community Summit | Room 13 | 13:00-18:00**

Meet the people that can support you in your community work, whether you are planning events, mentoring others, helping cultivate the Drupal Community or are new to the community looking to get involved.

**Government Summit | Hall 21 | 10:00-18:00**

The day-long Government Summit will feature experts sharing their insights, and will focus on engaging participants in discussions on the challenges of fostering Open Source projects in the public sector.

## Azri's Developer Contest - "Visualize Drupal" azri

"Come for the code, stay for the community" is something that we have heard time and again. So, for the contest we thought why not bring them together? Explore the user data provided by drupal.org and create some amazing visualizations which will display interesting insights into drupal growth, drupal adoption and demographics.

### The Prize

Build an amazing visualization and you can ride back from DrupalCon in your very own Classic Royal Enfield MOTORCYCLE!

### Help Desk

Azri will have a help desk on **Thursday, 18 February** on the Ground Level of Victor Menezes Convention Center.

Stop by during breakfast (8:00-10:00) or at lunch (13:45-14:45) to get your questions answered, or simply to admire the awesome prize!

### Submissions

Entries must be submitted at [www.azrisolutions.com/drupalconasia-devcontest](http://www.azrisolutions.com/drupalconasia-devcontest) by **23:59 IST on Thursday, 18 February**

### Questions or Concerns?

# Sunday, 21 February

## Maps

Come collaborate in person with hundreds of other Drupal community members and help improve Drupal. All are welcome to participate in this free event and no previous core experience is required.

Sprints are taking place at Lecture Hall Complex. Breakfast and lunch are served at the First Floor Foyer.

### Breakfast

**Time:** 8:00-10:00

**Lecture Hall Complex | First Floor Foyer**

### First-Time Sprinter Workshop

**Time:** 10:00-13:45

**Lecture Hall Complex | Auditorium LA 101**

Come to this room to get up to speed with community tools: Drupal.org, issue queues, IRC, and installing Drupal 8 locally. Our mentors are excited to get you ready to tackle real issues.

### Mentored Core Sprint

**Time:** 10:00-17:30

**Lecture Hall Complex | Hall LH 101**

Come to this room if you can install Drupal 8 locally and are looking for mentors to help match your skills to an issue to work on.

### Contribution Sprints

**Time:** 10:00-17:30

**Lecture Hall Complex | Hall LH 102**

Come to this room if you know the issues you want to work on and have experience working with others in Drupal issue queues.

### Closing Session

**Time:** 17:30-18:00

**Lecture Hall Complex | Auditorium LA 101**

Look back at the past days, say goodbye, and celebrate DrupalCon Asia with us one last time!

# Quick Guide to Mumbai

Mumbai, also called Bombay, is India's largest city with some 20 million people calling it home. It is India's financial, commercial and entertainment capital. It is vivid, energetic, cosmopolitan, heady and overwhelming. We hope some of these tips will help you navigate this amazing city.

## Geography

Mumbai is built on what were originally seven islands. For simplicity's sake, we will look at Mumbai as made up of the City of Mumbai (called South Bombay or simply, Town), and the Western, Eastern and Central "Suburbs". Beware, Suburbs is a misleading term. South Bombay and the Western Suburbs, running along the Arabian Sea coast, is where most Mumbaikars live.

## Getting Around

Traffic in Mumbai is (mostly) predictable. Morning traffic goes north to south, with peak hours between 9:00–11:00. Evening rush, from south to north, starts around 17:30 and begins to ease around 20:30. IIT Bombay, the DrupalCon venue, is located in the north-western part of the Eastern Suburbs, so plan your travel carefully. Use Google Maps to estimate your travel time. The traffic overlay is quite accurate.

The most convenient way to get around is using taxi aggregators like Uber or OlaCabs. There are apps for these in most phones' app stores. For shorter hops, it is cheaper to take the ubiquitous black and yellow auto-rickshaws (tuk-tuks). If you want to avoid the pollution, don't get stuck in one during rush hours. Note: Rickshaws are not allowed in South Bombay.

In South Bombay and in the popular Suburbs, there are plenty of black and yellow cabs available, called kaali-peeli (black-yellow). However, they can be temperamental and not always go where you would like to. Drivers in Mumbai are by and large quite honest. However, always make sure to go by the meter when traveling by rickshaws or kaali-peeli.

If you have nerves of steel and you're feeling adventurous, try traveling in the local trains. They are the best way to beat the traffic, but are not for everyone. Make sure you have a local friend to guide you along.

# Quick Guide to Mumbai

## Where To Go

The DrupalCon Asia venue, **IIT Bombay**, is located in the Powai area of the Eastern Suburbs, next to the Powai Lake. The sprawling campus is great for walks. **Hiranandani Gardens** in Powai has excellent restaurants and wide sidewalks (a rarity in Mumbai).

**Bandra**, the Queen of the Suburbs, is a beautiful, charming, leafy, cobblestoned neighbourhood running along the coast. The sea-facing promenades of Carter Road and Bandstand are great for walks, jogs and biking. Bandra is full of hip cafés, bars, restaurants, old Portuguese-style houses and graffiti-lined village streets.

**South Bombay**, with its gorgeous architectural treasures and that old city atmosphere, is steeped in history. Visit **Colaba**, the Colaba Causeway and the famous Gateway of India. **Marine Drive** is the longest sea-facing promenade in Mumbai where you can witness spectacular sunsets from the rooftop restaurants. For amazing architecture, art galleries, and delightful street corners and nooks, go to **Fort**, the heart of the old city.

Thank you to our awesome keynote,  
Danese Cooper.

Thank you, Dries.

Thank you to all of the incredibly  
dedicated volunteers from around India  
and the globe for working together to  
create an amazing Con

Thank you to all of our speakers and  
trainers. You are the core of our  
conference and the main reason that  
people come to DrupalCon. We want to  
thank each and every one of you!

As always, thank YOU for coming. We  
hope you've learned a little something,  
made some new friends, and most  
importantly, had a great and  
memorable week.

See you in New Orleans!

**The DrupalCon Asia Team**

We Burn With Passion For Drupal.

# Do You?

We're a global team of fiery open source  
evangelists. It all started with just a few  
sparks. And there's room for one more.

# Code of Conduct

DrupalCon brings together people from around the world who use, develop, design, and support the Drupal platform. Many attendees at DrupalCon are newcomers evaluating both our platform and our community.

The Drupal Code of Conduct (<http://drupal.org/dcoc>) outlines our shared ideals and values. This document expresses how we hope to make these ideals real at our conferences and other events. Our goal is to ensure that all participants can freely and openly share ideas in a friendly, safe, and welcoming environment that encourages and inspires mutual respect and collaboration.

## Come for the Software, Stay for the Community

Drupal would simply not exist without its community. We want all attendees at DrupalCon to have an awesome experience, both in and out of formal conference sessions.

The purpose of this document is not to restrict the diversity of ideas and expression in the Drupal community; rather, it's to raise awareness of the potential for actions that could alienate valuable members — and potential members — of the community.

## We are Considerate

DrupalCon is an international event that attracts diverse people from a wide variety of ethnic, cultural, and religious backgrounds. We acknowledge that cross-cultural communication can often be complicated and encourage everyone to consider both the impact of their actions on those with different backgrounds and experiences and the honest intentions of those who may have unknowingly caused offense.

## We are Welcoming

One of the greatest strengths of the Drupal community is our inclusiveness. Making all attendees feel welcome and included at DrupalCon is everyone's job, including exhibitors and sponsors.

## We are Respectful

Sponsors, volunteers, speakers, attendees, and other participants should strive to treat all people with dignity and respect, regardless of their culture, religion, physical appearance, disability, race, ethnicity, gender, or sexual orientation.

## We are Collaborative

If and when misunderstandings occur, we encourage people to work things out between themselves whenever possible. People are encouraged to take responsibility for their words and

actions and listen to constructively presented criticism with an open mind, courtesy, and respect.

## When We Disagree, We Consult Others

If people are unable to work out issues between themselves, they are encouraged to seek the advice of a mutually trusted third party or a designated community volunteer to help mediate.

## When We Need it, We Ask for Help

We do not tolerate harassment of conference participants in any form. If you feel threatened or violated as a result of intimidating, harassing, abusive, discriminatory, derogatory or demeaning conduct, please immediately notify a conference staff member. Likewise, please immediately notify a staff member if you notice that someone else is being subjected to such behavior.

## Contact the Community Working Group

If contacting the CWG about an incident, we need all available information: who's involved, what specifically caused the incident, what steps were taken to resolve it prior to contacting the CWG, any log files or other data to corroborate the event, etc.

## If the matter is urgent, please contact the following individuals on-site:

**Surendra Mohan** Please reach out via Whatsapp first - +91-9167095796. If unavailable, reach out via email at [surendra.mohan.singh@gmail.com](mailto:surendra.mohan.singh@gmail.com) or @surmohan on Twitter

**Donna Benjamin** at [kattekrab@gmail.com](mailto:kattekrab@gmail.com) or @kattekrab on Twitter

You may also contact the Drupal Community Working Group to help mediate or resolve issues via email at [drupal-cwg@drupal.org](mailto:drupal-cwg@drupal.org) or with an online incident report.

The DrupalCon team wants everyone to feel safe for the duration of the conference. If necessary, conference staff are empowered to take appropriate actions that may include, but are not limited to, warnings, expulsion from the conference without refund, and referrals to venue security or local law enforcement.

## We're All in this Together

Thanks for making DrupalCon awesome for everyone! The DrupalCon Code of Conduct is licensed under a Creative Commons Attribution 3.0 Unported License (<http://creativecommons.org/licenses/by-sa/3.0/>) and is available for others to use and adapt for their own events.

# SHOW YOUR SUPPORT

Many DrupalCon organizers and volunteers are members of the Drupal Association.  
Here's why they support the Drupal project and community with us:

Aneek Mukhopadhyay, aneek, Kolkata

It is my pleasure to be part of this community and the Association. I know my membership supports many Drupal enthusiasts with scholarships and grants. It feels good to give something back to the community when you know it's helping others for a right cause.

Neetu Morwani, neetu morwani, Jaipur

I came for the software, but now what binds me to Drupal is the community. The community is full of vibrant and helpful people who are always ready to mentor you on each and every step. You also get to mentor and share your experiences with other people. With such fantastic people around you, work becomes more fun and this helps you in growing personally and professionally.

Cheers to all the members of the community for putting in efforts to make Drupal one of the upcoming and trending technologies.

Ravindra Singh, RavindraSingh, Delhi

My eagerness to learn Drupal made me turn to Drupal community. It is a place where Drupalers from across the world share their knowledge and experience on Drupal. I got hooked onto the community and started sharing too. I mentored people in DrupalCon Los Angeles which was an awesome experience. I believe giving back to the community is the fastest way to learn and grow.

Campbell Vertesi, onthegumanatee, Germany

We all say "we come for code, but we stay for community." That community is no accident - it takes a lot of work and planning to connect Drupalists around the world through platforms like drupal.org and events like DrupalCon. Your membership is what makes that happen. Please join, and help us support the future!

Rachit Gupta, rachit\_gupta, Mumbai

I discovered Drupal in 2009 and took it as my career choice in 2010. I fell in love with the awesome Drupal community and decided to give back to this community in whatever way I can. I was motivated and inspired by some community members and with their support I started Drupal Mumbai which has now more than 550+ Members. I have worked on several Drupal initiatives like organizing Drupal Camps, Conducting regular Drupal Meetups, Drupal knowledge sessions, Sprints, Promote Drupal in Education (drupalcoe.org) etc. Drupal Association has been very helpful in providing every possible support to make all this happen.

My Drupal journey has been incredibly awesome; it has made a big difference in my life. I have seen Drupal empowering many lives.

Drupal Association supports every aspect of Drupal and Drupal Community. Supporting the team that supports our community is what matters the most to me. I renew my membership every year and try to promote Drupal in all ways possible.

Gauravjeet Singh, gauravjeet, Delhi

In Drupal, we trust. I always wanted to build something awesome and share it with many people. Drupal gave me that head start. The spirit of Drupal is learning and collaboration. I have had many awesome experiences and I've learned so much from my friends, colleagues, and from the community as a whole.

Drupal Association is doing a wonderful job to attract individuals around the globe to this awesome thing called Drupal. Their efforts are paying off as they are organizing DrupalCon, Drupal Camps, and meetups and for that the community has come so far today.

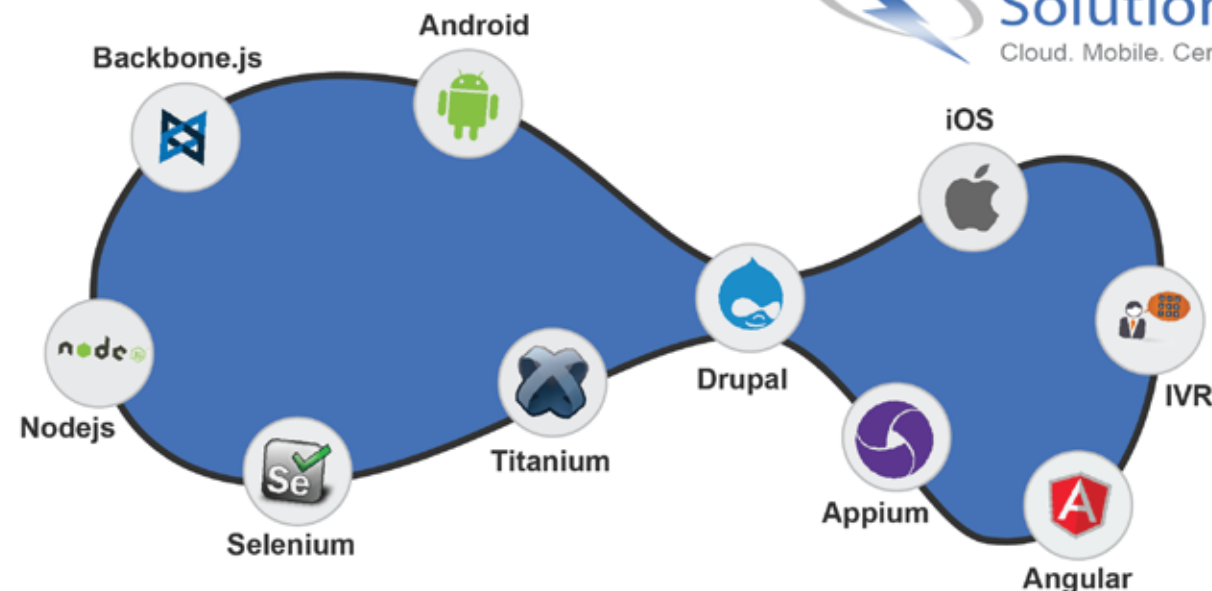

Manjit Singh, Manjit.Singh, Barnala

I and some of my colleagues are contributing to Drupal on daily basis. We have learned a lot of things about leadership, project management, responsibility, and obviously Drupal, from working on particular modules or themes.

Drupal Association is helping the Drupal family with funding, and with organizing DrupalCons. In short Drupal Association is the heartbeat of Drupal. :)
