Reply-To: noreply@jerkyco.in

gulliver,

A request to reset the password for your account has been made at JerkyCoin.

You may now log in by clicking this link or copying and pasting it into your browser:

http://jerkyco.in/user/reset/31/1554477294/QWXGXcVe4a8qea2KRYNgWNTAX3uR1YwZqTIhu343HHk

This link can only be used once to log in and will lead you to a page where you can set your password. It expires after one day and nothing will happen if it's not used.

-- JerkyCoin team

JerkyCoin
We've received your withdraw request
Inbox - Zengenuity 11:33
To: gulliver@jerkyco.in,
Reply-To: JerkyCoin

This is to inform you that we've received your request to withdraw from your JerkyCoin w
Please note that due to large withdraw request volumes and the recent difficultly in finding partner fiat meat packing providers, we're currently experiencing a **4 - 6 month delay** before we can transfer jerky to customers.

We apologize for this issue and appreciate your patience,

Customizing Swift Mailer

swiftmailer.html.twig

```
<html>
<head>
<style type="text/css">
table tr td {
  font-family: Arial;
  font-size: 12px;
}
</style>
</head>
<body>
<div>
  <table width="800px" cellpadding="0" cellspacing="0">
    <tr>
      <td>
        <div style="padding: 0px 0px 0px 0px;">
          {{ body }}
        </div>
      </td>
    </tr>
  </table>
</div>
</body>
</html>
```

Customizing Swift Mailer

swiftmailer.html.twig

```
<html>
<body>
<div>
  <table width="800px" cellpadding="0" cellspacing="0">
    <tr>
      <td>
        <div style="padding: 0px 0px 0px 0px;">
          {{ body }}
        </div>
      </td>
    </tr>
  </table>
</div>
</body>
</html>
```

Customizing Swift Mailer

swiftmailer.html.twig

```
<html>
<head>
<style type="text/css">
table tr td {
  font-family: Arial;
  font-size: 12px;
}
</style>
</head>
<body>
...
</body>
</html>
```

Responsive Design

```
<style>
    @media only screen and (min-width: 650px) {
      .md-float-right {
        float: right;
        margin-left: 40px;
      }
      .md-right {
        text-align: right;
      }
     .md-mb20 {
        margin-bottom: 20px;
      }
      .md-mb0 {
        margin-bottom: 0;
      }
      .md-center {
        text-align: center;
      }
    }
</style>
```

Web Fonts

```
<style>
    @font-face {
      font-family: 'Bitter';
      font-style: normal;
      font-weight: 400;
      src: local('Bitter Regular'), local('Bitter-Regular'),

Easy Email

Easy Email

View | Version control | Automated testing

Posted by zengenuity on *27 December 2018*, updated *27 December 2018*

This project is not covered by Drupal's security advisory policy.

Easy Email is an HTML email system for Drupal 8, designed to be as simple as possible to configure, with a robust set of features.

Requirements

- Mail System
- Swiftmailer

How Is Easy Email Different From Other Modules?

There are a lot of HTML email contrib modules, and some of them are functionally similar to Easy Email. But, they all require a significant amount of work to configure. Many of them also require an in-depth knowledge of how Drupal and email mime processing work. Easy Email tries to take care of all that for you out of the box with sensible defaults, so you can just enable the module, create a template, and then start sending HTML emails without a lot of other configuration. That's the dream, anyway.
