We make BIG websites

```
for (var i = 0; i < count &lt; 2) {  
  // do something  
  // do something  
  // do something  
  // do something  
}
```

```
var imageWidth;  
var imageHeight;  
// do something  
// do something  
// do something
```

ORIGIN

Empowering 775+ Communities

Replace your traditional intranet with
your own **open source community**

Emma 20 min ago

Nice! We can order discussions in groups now.

Kwame 7 min ago

Yes, works much better than our old intranet :D

Peter

This is my first post, hello Open Social

LimoenGroen
sustainable websites

Most websites are
rebuild every
2 to 3
years

WHY

?

Accessibility as added value

- **A way to reach a wider audience**
25% of all people have a handicap
- **A way to score much better on Google**
<https://www.drupal.org/about/accessibility>
- **The 'right' thing to do**

Compare it with responsive design

- You don't want to ignore a part of your users
- You should not decide whether to hide certain parts of the website to some users
- With just a bit more effort, you gain a lot
- It lowers the Total Cost of Ownership

It's not rocket science.

Build **websites that last** and that **can be used by everyone**. Your clients & end-users will love you for it.
