Layout Builder is beta!

- API and data model are stable

- Essential functionality in place

- Basic UI built with the new Off-Canvas Dialog

Some known issues

- Drag-and-drop for large items is tricky

- Support for Quick Edit is missing

- Translation and revision support is lacking

Where we'll be for 8.6

8.6 Roadmap

- Support inline custom content

- Allow opt-in/opt-out for different content types

- Migration path from Panelizer to Layout Builder

- ...your favorite issue here!

Where we need help

Real-life scenarios

- Combinations with other contrib modules

- Interactions with custom code

- Cross-browser support

New ecosystem modules

- Some features of contrib modules need a home
  - Panelizer's "multiple defaults"
- New ideas and implementations
  - "Full page" layout tool?
