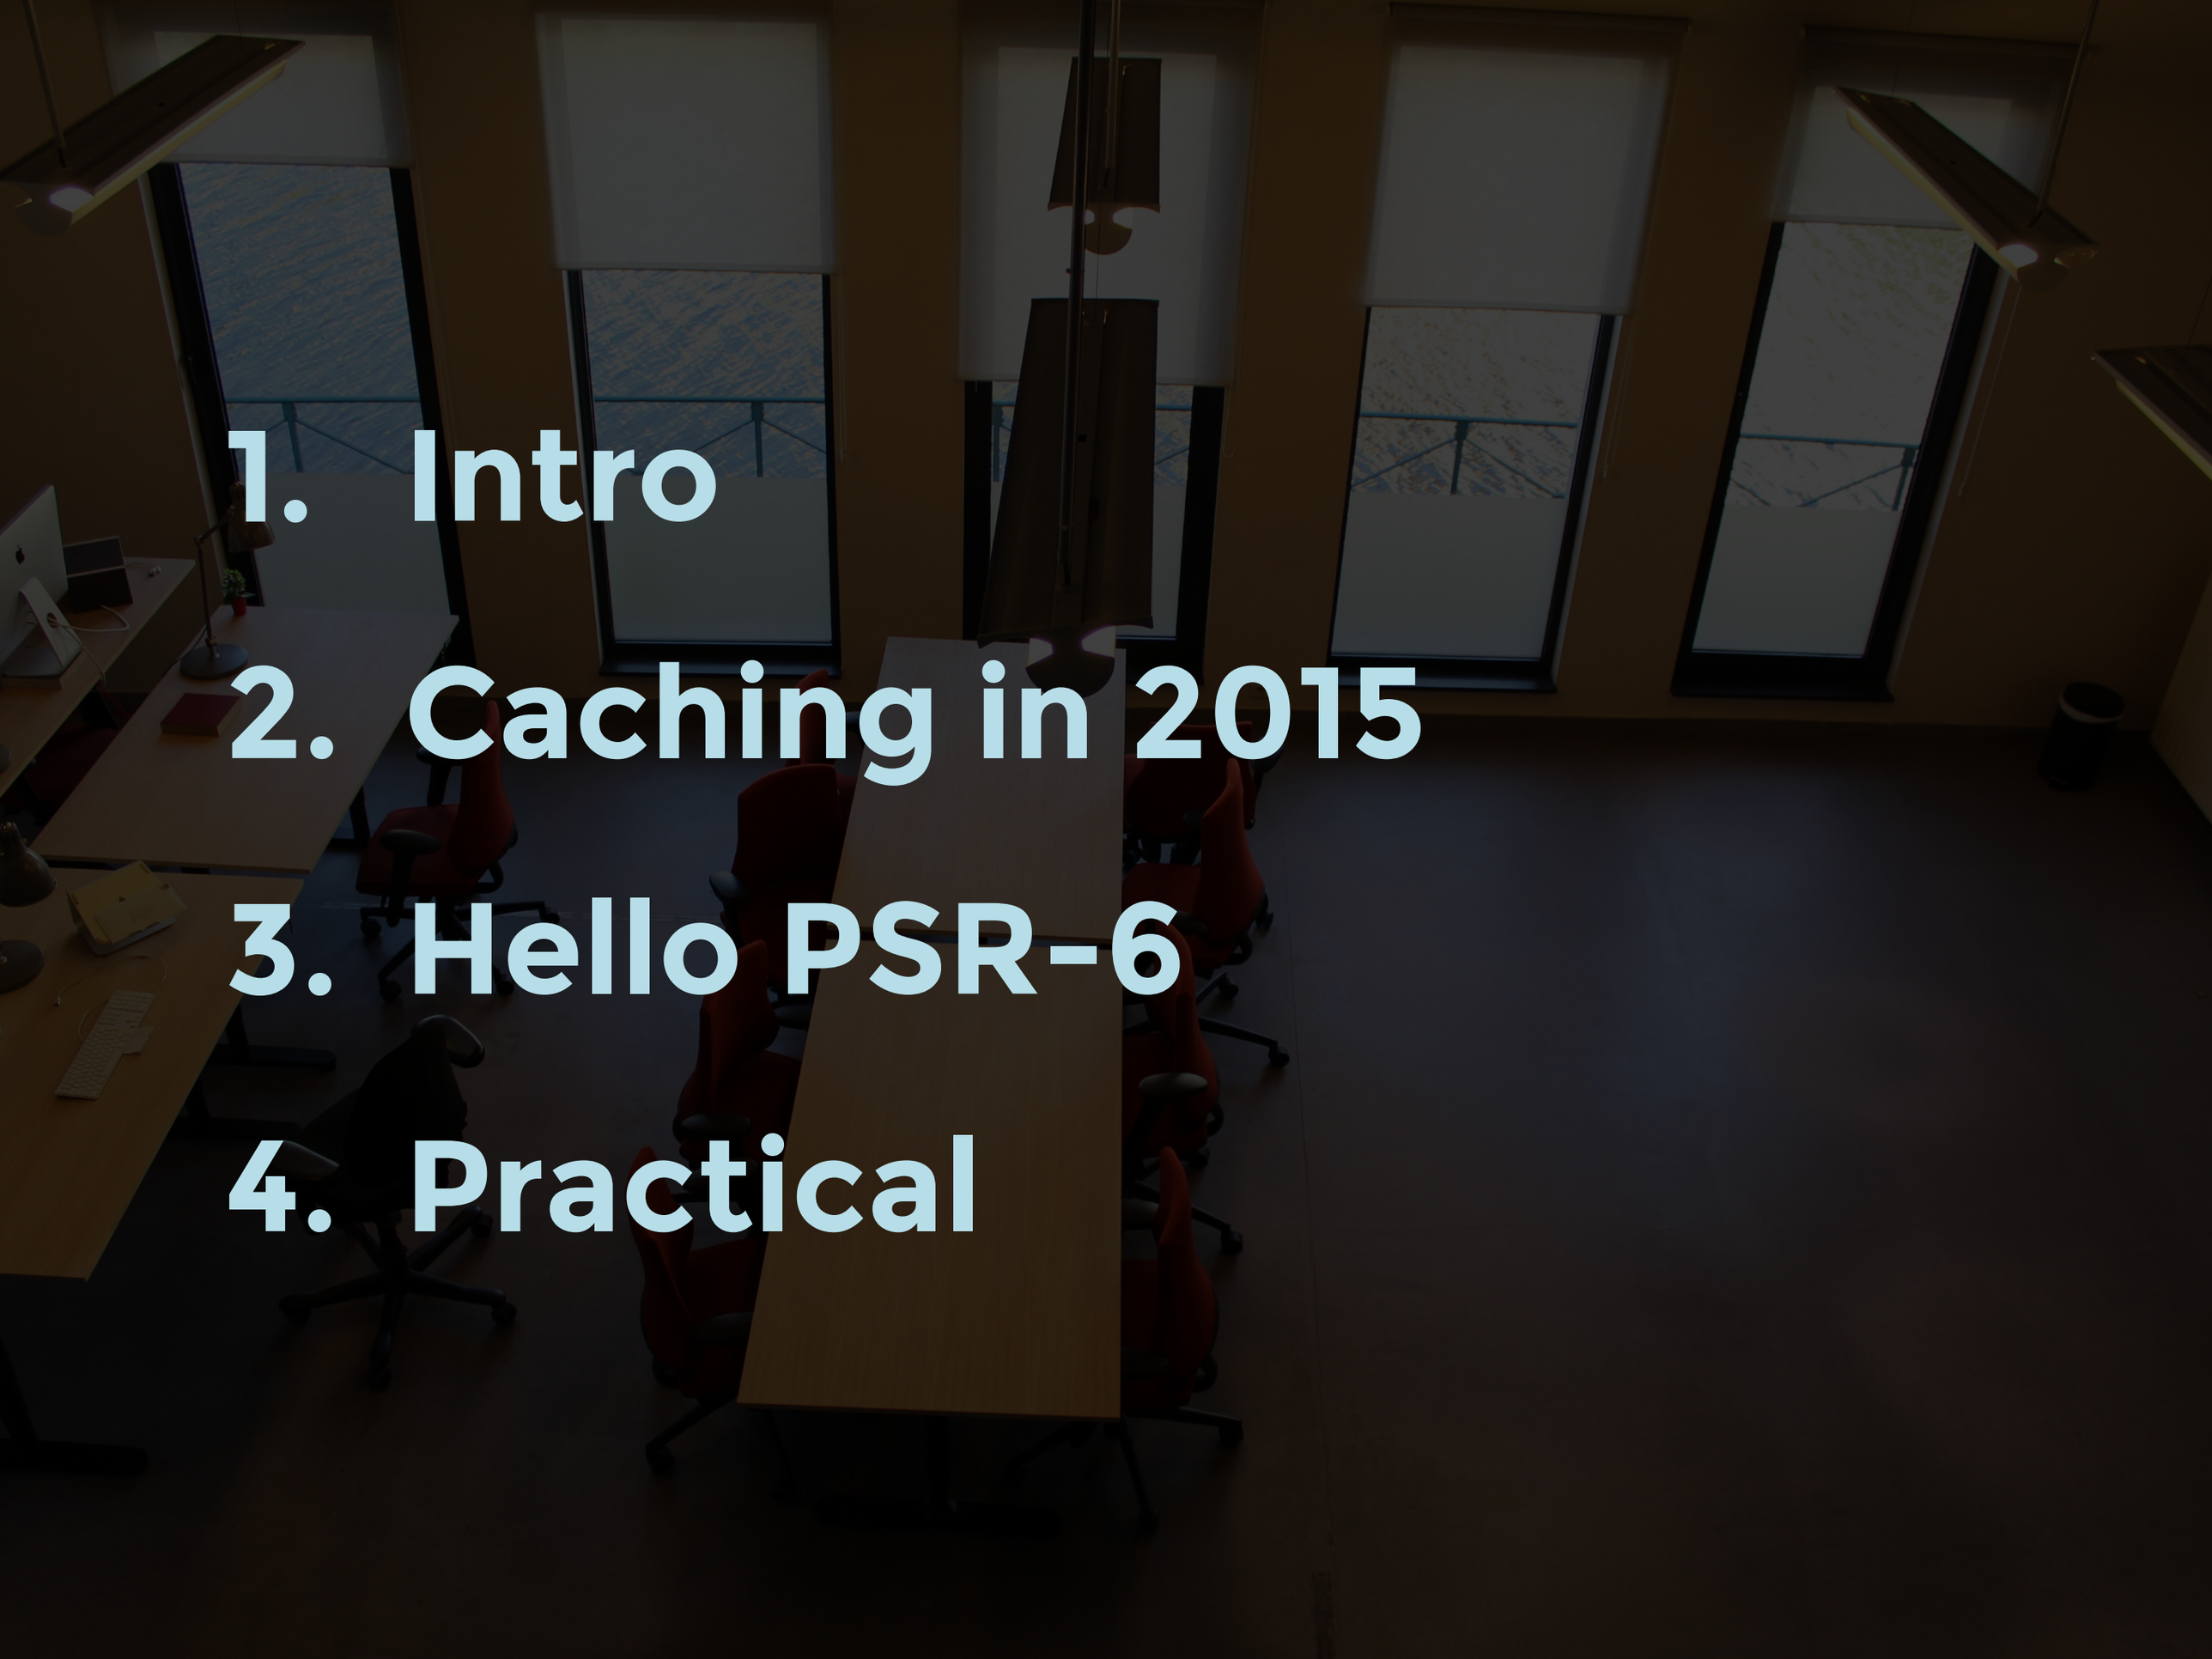
PSR-6

Caching in PHP anno 2016



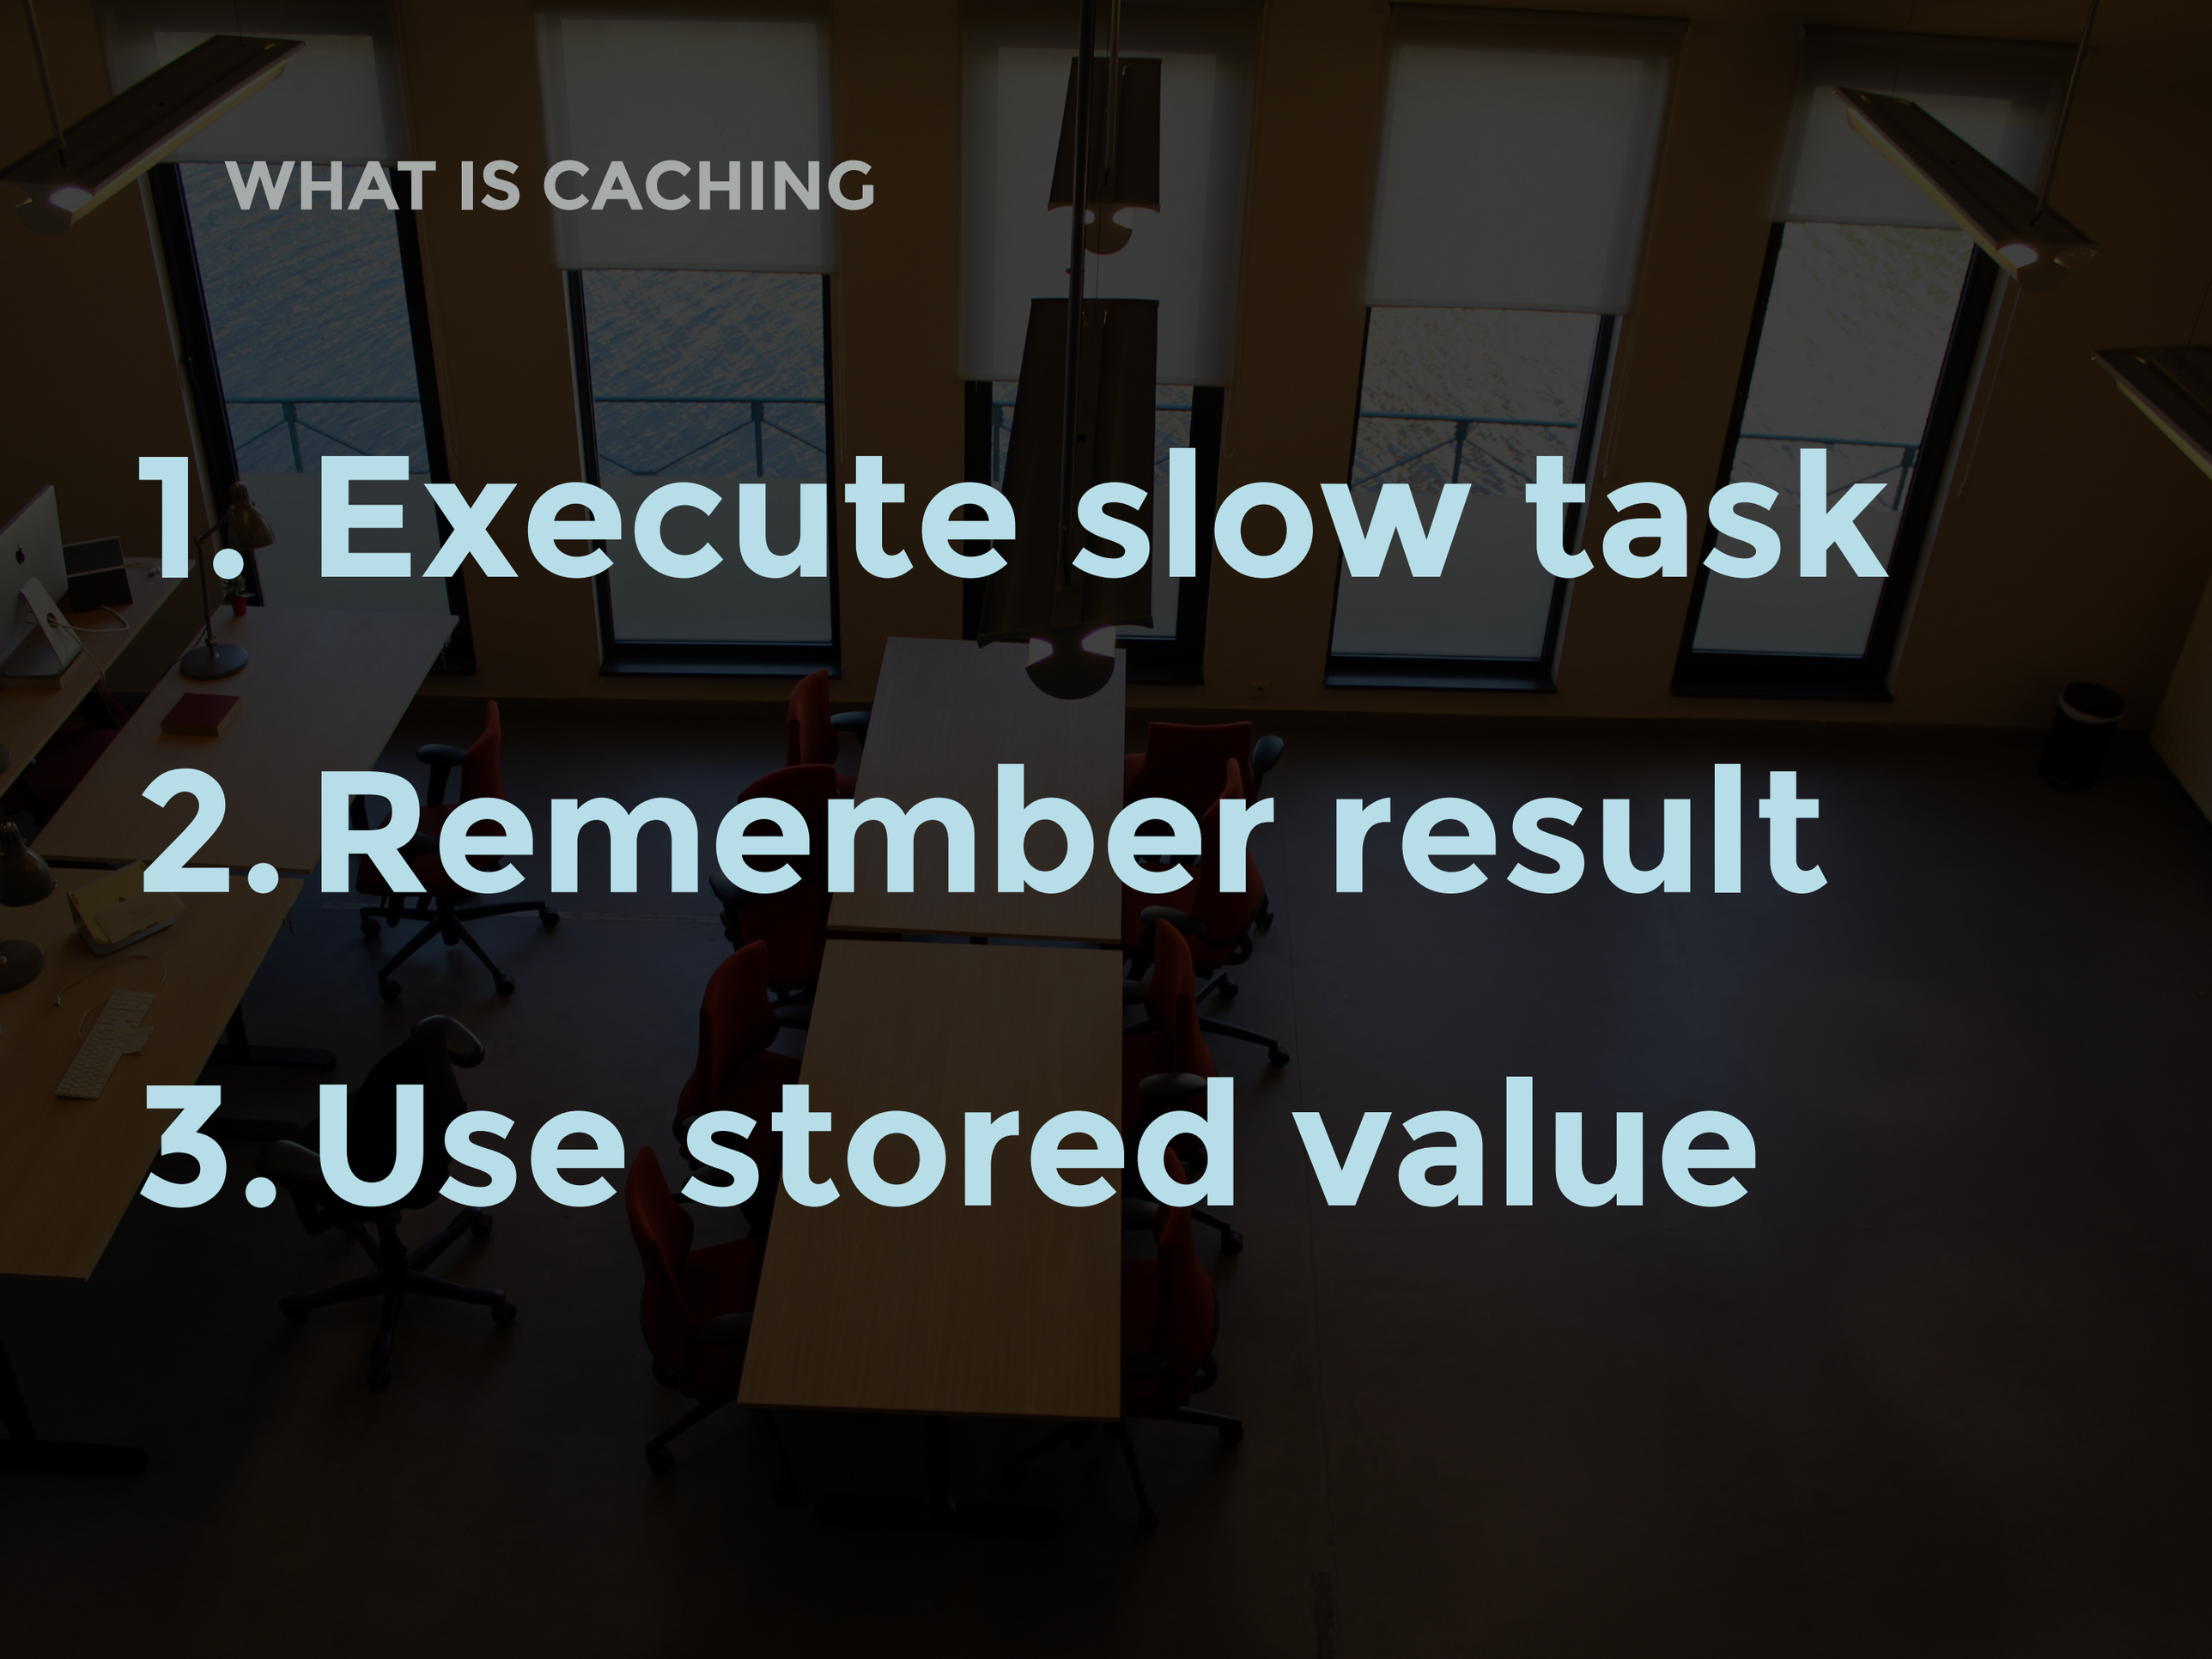
1. Intro
2. Caching in 2015
3. Hello PSR-6
4. Practical

1. Intro

what is caching?

WHAT IS CACHING

Speeding up your app



WHAT IS CACHING

1. Execute slow task

2. Remember result

3. Use stored value

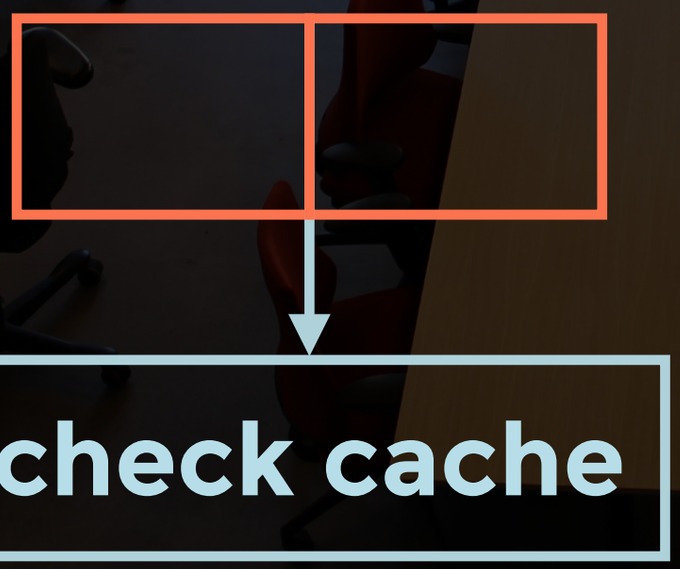
Should not cause app failure

WHAT IS CACHING - EXAMPLES

- HTTP Request
- Slow DB call
- Process image/zip/...

Should not cause app failure

WHAT IS CACHING



Should not cause app failure

At different layers:

User-Agent

Webserver (Varnish/Nginx)

Application

Opcache

Should not cause app failure

2. Caching in 2015

the state of caching (pre PSR-6)

APPLICATION CACHING IN 2015

1. Libraries do it

2. Frameworks do it

3. Cache libs do it

APPLICATION CACHING IN 2015

Frameworks & cache libs have their own:

- interfaces
- support for caching systems

APPLICATION CACHING IN 2015

Adapters everywhere!

If no adapter available

- Write your own
- Store in different cache stores

3. Hello PSR-6

what does that mean?

INTRODUCING PSR-6

Finalised & accepted in December 2015

INTRODUCING PSR-6

Repository - Entity

INTRODUCING PSR-6

```
use Psr\Cache\CacheItemPoolInterface;
use Psr\Cache\CacheItemInterface;

$item = $pool->getItem($key);

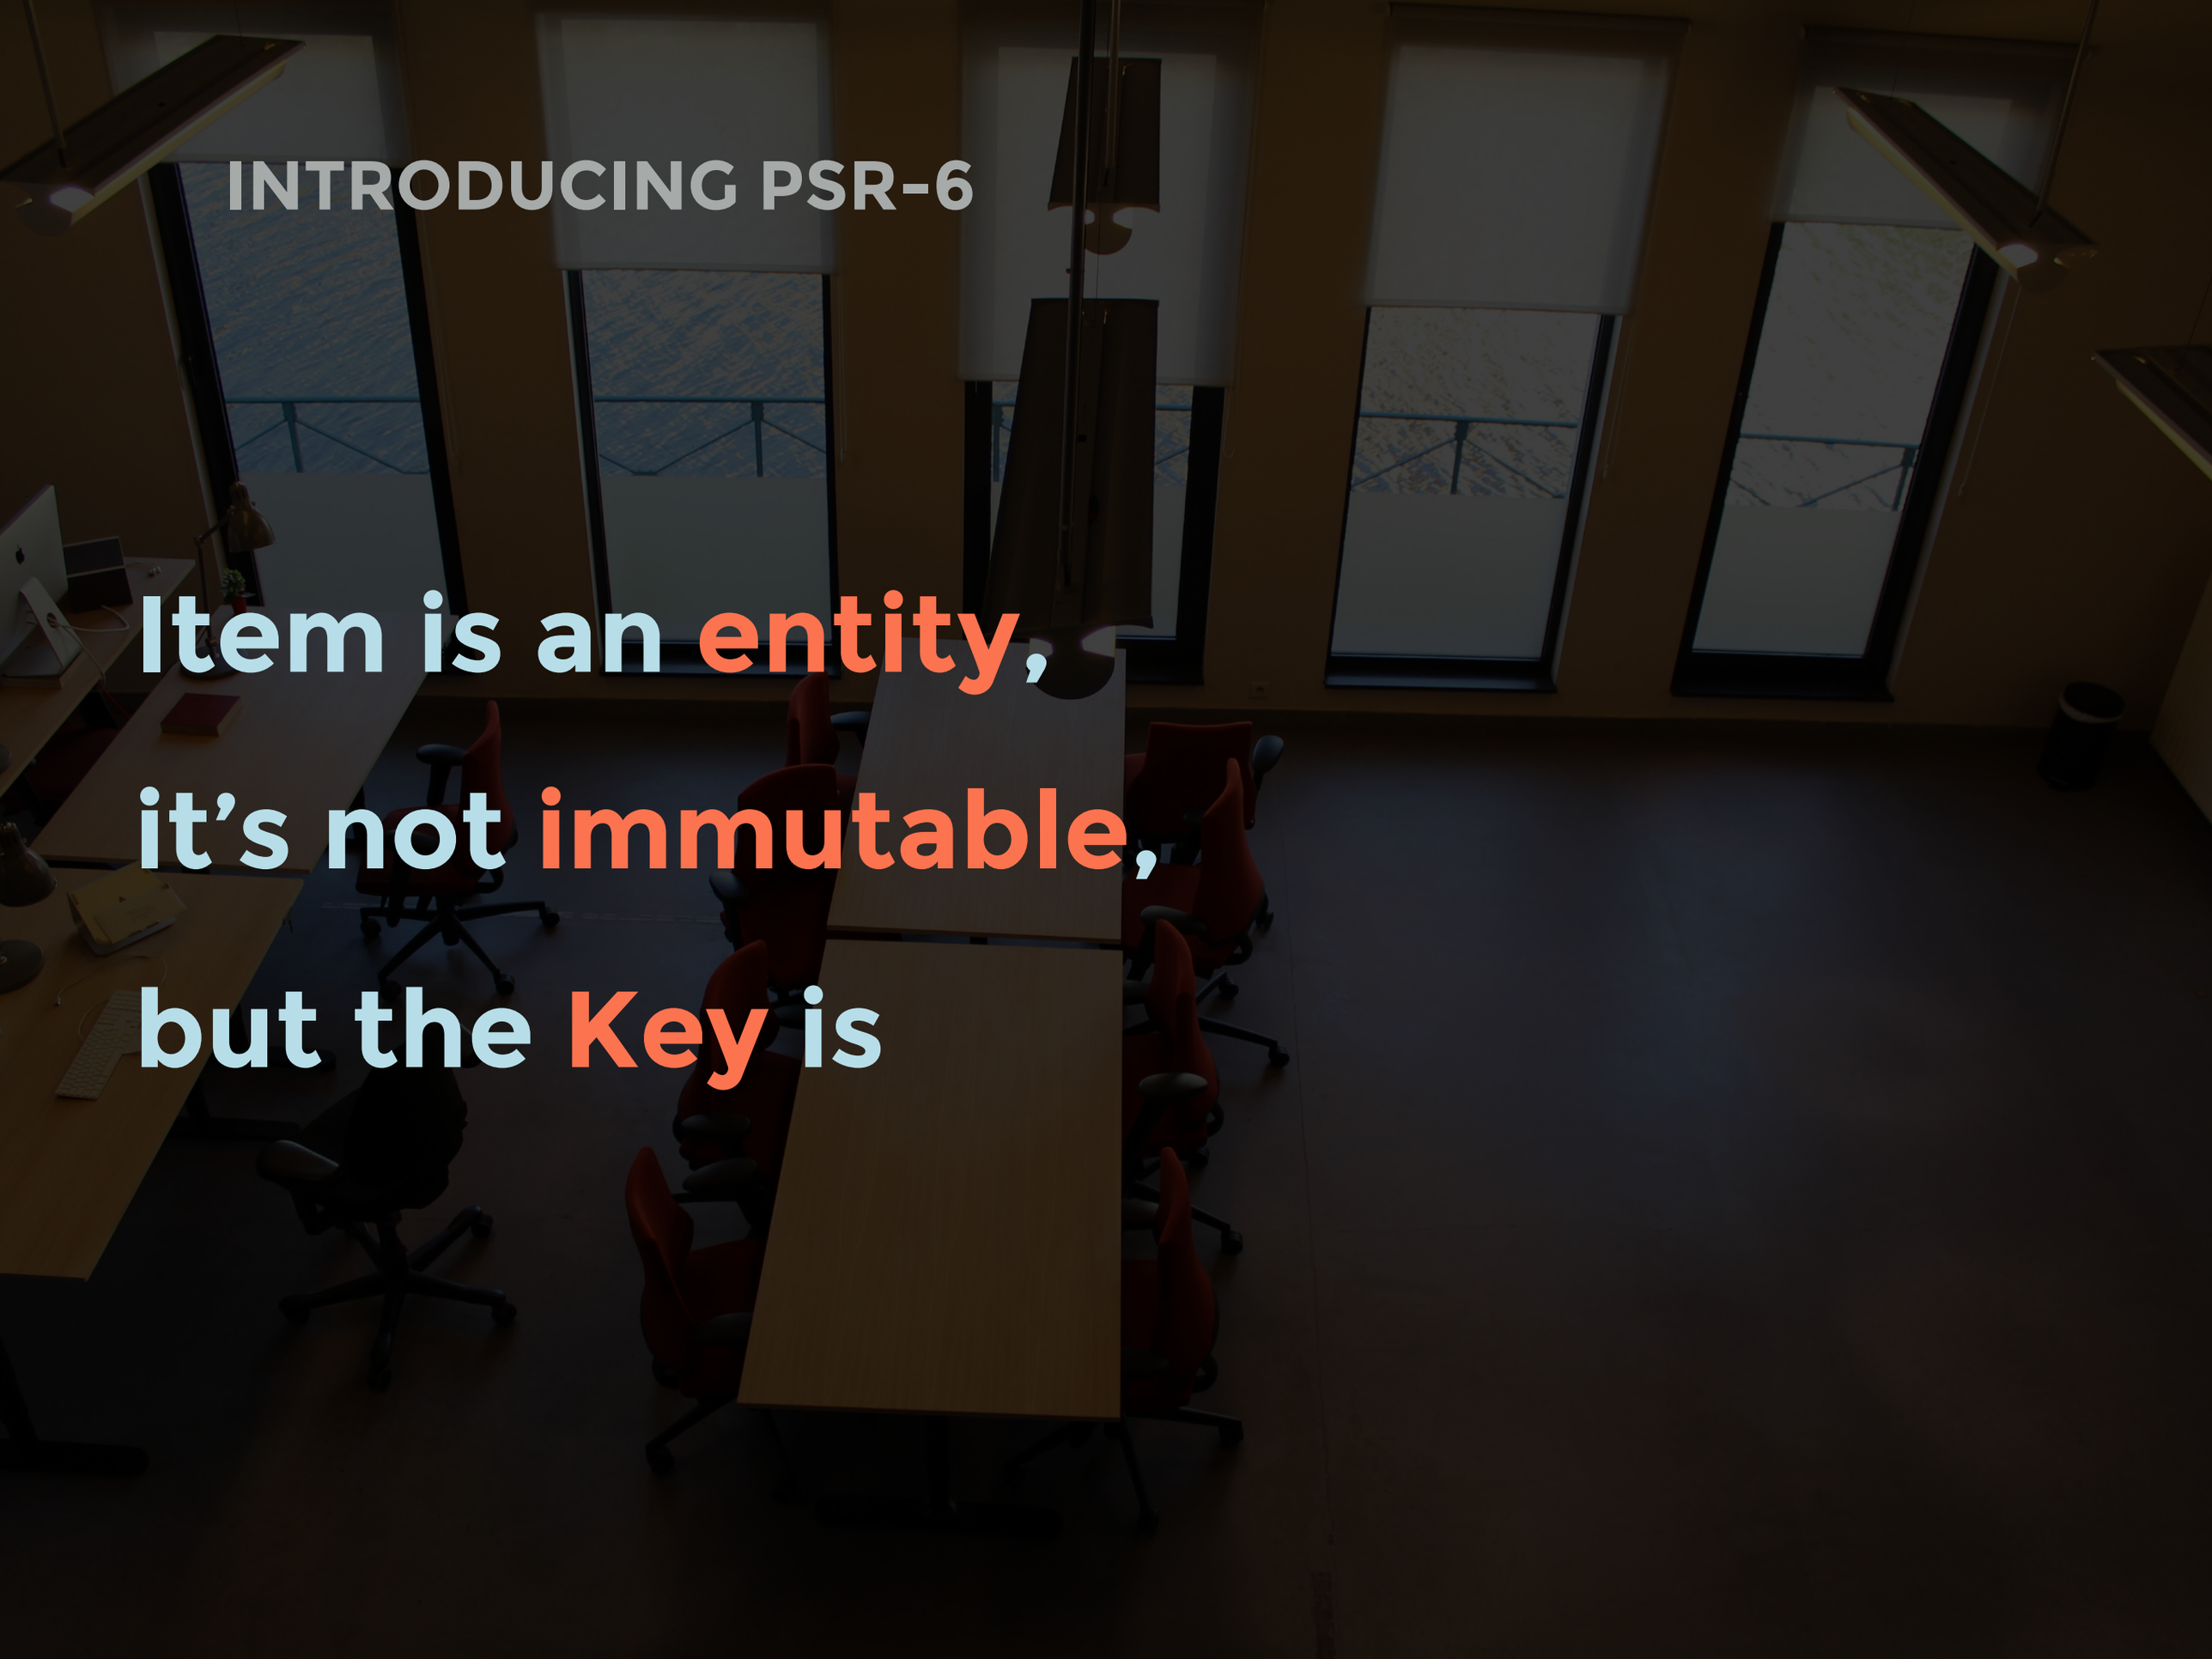
$item->getKey();
```

INTRODUCING PSR-6

Lemme see that code

Don’t instantiate your own Items.

```
$item = $pool->getItem(‘key’)
    ->set($value)
    ->expiresAfter(3600);
$pool->save($item);
```



INTRODUCING PSR-6

Item is an entity,

it's not immutable,

but the Key is

INTRODUCING PSR-6
CacheItemInterface
has no
getExpiresAt

Pool has support for multi-actions

```
$pool->getItems($keys);
$pool->saveDeferred($item);
$pool->commit();
```

INTRODUCING PSR-6

Repository - Entity model

allows extensions

INTRODUCING PSR-6

Cache features:

- Stampede protection:

Parallel incoming requests executing long process to update cache value

INTRODUCING PSR-6

Cache features:

- Stampede protection
- Taggable cache

```
$item->addTags(['cat-1']);
$pool->clearTags(['cat-1']);
```

INTRODUCING PSR-6

Cache features:

- Stampede protection
- Taggable cache
- Hierarchical cache

```
$pool->delete('tree/*');
```

4. Practical

who uses it, and how can I use it?

Packagist | Dependent Packages - psr/ | mwl

https://packagist.org/providers/psr/cache-implementation

Packagist *The PHP Package Repository* Browse Submit hannesvdvreken

Search packages...

Packagist is the main Composer repository. It aggregates public PHP packages installable with Composer.

The following packages provide psr/cache-implementation

tedivm/stash

The place to keep your cache.

PHP ↓ 414 515 ★ 657

symfony/cache

Symfony implementation of PSR-6

PHP ↓ 13 429 ★ 13

cache/hierarchical-cache

A helper trait and interface to your PSR-6 cache to support hierarchical keys.

PHP ↓ 13 284 ★ 0

cache/array-adapter

A PSR-6 cache implementation using a php array. This implementation supports tags

PHP ↓ 4 659 ★ 2

cache/memcached-adapter

A PSR-6 cache implementation using Memcached. This implementation supports tags

PHP ↓ 6 302 ★ 3

Packagist | cache/filesystem-adapter - | mwl

https://packagist.org/packages/cache/filesystem-adapter

Packagist *The PHP Package Repository* Browse Submit hannesvdvreken

Search packages...

★ cache/filesystem-adapter

`composer require cache/filesystem-adapter`

A PSR-6 cache implementation using filesystem. This implementation supports tags

0.3.0 2016-02-25 08:03 UTC

requires

- php: ^5.5|^7.0
- psr/cache: ^1.0
- cache/adapter-common: ^0.3
- cache/taggable-cache: ^0.4
- league/flysystem: ^1.0

requires (dev)

- phpunit/phpunit: ^4.0|^5.1
- cache/integration-tests: ^0.9

suggests

None

provides

- psr/cache-implementation: ^1.0

conflicts

Search packages...

psr/cache-implementation dependents (6)

aequasi/cache-bundle

PHP ⬇ 72 355 ★ 36

Creates services in Symfony 2, for cache, that can also be used with doctrines three cache types. It also provides functionality for session handler support, and Router support.

cache/psr-6-doctrine-bridge

PHP ⬇ 3 265 ★ 2

PSR-6 Doctrine bridge

markup/contentful

PHP ⬇ 6 597 ★ 8

A client library to integrate with the Contentful APIs (Content Delivery and Content Management) for PHP 5.4+.

markup/contentful-bundle

PHP ⬇ 5 314 ★ 3

A Symfony2 bundle to integrate with the Contentful APIs (Content Delivery and Content Management) for PHP 5.4+.

markup/wistia-bundle

PHP ⬇ 856 ★ 1

The Markup Wista Bundle contains functionality for communicating with the Wistia Data API

START USING IT - UPGRADE

Frameworks

START USING IT - UPGRADE

Start using PSR-6 enabled libraries with adapters for current FW's implementation.

Example:

Laravel PSR-6 bridge
