# Our Time Together

- Background & Why **Layout Builder**  ~20 minutes
- Layout Defaults(think Manage Display)
- Layout Builder + Views = Power!

– 🤔 Questions ?  ~10 minutes

• Layout Overrides  ~20 minutes

• Landing Pages

– 🤔 Questions ?  ~10 minutes

• What's missing? What's next?  ~20 minutes

• Contrib Modules

– 🤔 Questions ?  ~10 minutes

# The Layout Initiative

Site builders **and** content authors **need** intuitive tools to build pages, change layouts, and add & rearrange blocks with live preview.

# When Do They Need It?

**When** Do They Need It?

**When** They Install Drupal!

# Layout Builder

# Layout Builder

What Does It Do?

# Layout Builder

- Flexible Layout Builder (duh)
- Previews in default theme
- Connects entity display to Views & other blocks
- Allows Per Entity Customization
- Powerful Page Builder

# Layout Builder

# Layout Builder

When Can I Use It?

# Layout Builder

8.7.0 - 3 Weeks Away!

# Layout Builder

8.7.0 - 3 Weeks Away!

It's Stable! 🎉

## Give it a go and grow your own herbs

by [Holly Peck](#) • 2nd April 2015

Tags: [Grow your own](#) [Seasonal](#) [Herbs](#)

There's nothing like having your own supply of fresh herbs, readily available and close at hand to use while cooking. Whether you have a large garden or a small kitchen window sill, there's always enough room for something home-grown.

### Outdoors

#### Mint

Mint is a great plant to grow as it's hardy and can grow in almost any soil. Mint can grow wild, so keep it contained in a pot or in a tight corner and take over your whole garden.

#### Sage

Content items can be displayed using different view modes: Teaser, Full content, Print, RSS, etc. *Teaser* is a short format that is typically used in lists of multiple content items. *Full content* is typically used when the content is displayed on its own page.

Here, you can define which fields are shown and hidden when *Article* content is displayed in each view mode, and define how the fields are displayed in each view mode.

Manage layout

▼ LAYOUT OPTIONS

- Use Layout Builder
- Allow each content item to have its layout customized.

Save

# Layout Overrides

- Allows Individual entities(nodes, etc) to have unique Layouts
- Only available for “Default” View Mode(not Teaser, etc)
- Starts from Bundle defaults but not synced

# Layout Overrides

- Stored as Layout Field (locked)
- Not deployed with Configuration Management
- Works with Content Moderation

# Layout Overrides: Permissions

- Configure any Layout
- 2 bundle level permissions
  - Configure all items of Bundle (article, tags, etc.)
  - Configure only all items the user can edit

# Layout Builder

# Layout Builder

Custom Blocks(Inline Blocks)

# Custom (Inline) Blocks

- Allows Creating Custom Blocks inside Layouts
- Uses **same blocks types** as Custom Block library
- Inline Blocks are not available in Custom Block libraries

# Example: Add A Recipe To An Article

- Urgent request from client to promote a Recipe on a related article
- Client wants it yesterday

DIAMOND SPONSORS

# What's next for the Layout Initiative

tim.plunkett

After over two years of work done by the Layout Initiative, Drupal 8.7 is slated to be the first release of Drupal Core to include a stable layout tool.

This tool, Layout Builder, is primarily intended for content editors to use for simply making complex pages. It is also a powerful site building tool that affords great flexibility across all content.

Attendees do not need any prior experience with Layout Builder. Comparisons will be made to existing layout tools like Panels, Panelizer, Display Suite, Block UI, and Paragraphs.
